Questions and Evaluation Scheme

Sl. No.	Course	No. of questions	No. of alternative answers	Mark for every correct answer	Max. marks	Negative marks for every wrong answer	Other Points
1	M.B.A.	100	4	1	100	1/3	Multiple shading will be considered as wrong answer and 1/3 mark will be reduced.
2	M.C.A. / M.C.A. (Lateral Entry)	100	4	1	100	1/3	Multiple shading will be considered as wrong answer and 1/3 mark will be reduced.
3	M.E. / M.Tech. / M.Arch / M.Plan						
	Part - I	20	4	1	20	1/3	Multiple shading will be considered as wrong answer and 1/3 mark will be reduced.
	Part – II	35	4	1	20	1/3	All the correct answers upto 20 will be awarded marks and all the wrong answers shall be taken into consideration for awarding negative marks. Multiple shading will be considered as wrong answer and 1/3 mark will be reduced.
	Part – III	60	4	1	60	1/3	Multiple shading will be considered as wrong answer and 1/3 mark will be reduced.

Note: Marks will not be deducted for the questions left unanswered.

6.2 Normalisation of marks for M.E./ M.Tech. / M.Arch. / M.Plan.

The entrance test question paper for M.E. / M.Tech. / M.Arch. / M.Plan. will have two common parts, Part – I Engineering Mathematics and Part – II Basic Engineering & Sciences, and Part – III meant for different disciplines. On evaluation, the average marks may vary from discipline to discipline under Part – III. Thus, Marks of Part III will be computed using the formula

$$\text{Computed Marks of Part III} = (X+r)m$$

Where X is the adjustment factor, r is the raw mark scored by the candidates and m is the multiplication factor used to level the averages of all subjects.

This gives the relative ranking of the candidates in any discipline.

Candidates who have written the TANCET will normally be notified with actual marks and percentile score they have obtained, at the time of publishing result. However, to avoid projecting negative scoring, the final score card contains only the percentile score. The percentile score is calculated using the formula:

$$\text{Percentile Score} = (Y/N) * 100.$$

where Y is number of students scored lesser mark than the candidate in that examination and N is the total number of students appeared for the examination.

6.3 Answer sheet handling

The candidate has to choose the correct answer and shade the corresponding small open box provided for that question in the answer sheet with a black ball point pen only. If more than one open box is shaded for any question, then it will be treated as wrong answer. The answer sheets shaded in pencils will not be evaluated.

The shaded information is scanned and the details are transferred to computer for evaluation. Even a small stray of Pen mark on the sheet will be captured by the scanner which may result in wrong evaluation. The open box should be fully shaded so that the number printed inside completely disappears. Improper shading and light shading are likely to be missed by the scanner, which may also result in wrong evaluation.
